NGK - RANGE ROVER EVOQUE

NGK Spark Plugs (UK) Ltd has won an OE contract to supply spark plugs for a stylish new vehicle.

The brand-leading supplier of spark plugs, glow plugs and Lambda sensors is to supply spark plugs for all the petrol models in the new Range Rover Evoque range.

The Evoque – which goes on sale from September this year – is powered by a new 240PS 2.0-litre Si4 petrol engine that combines direct fuel injection, turbocharging and twin variable valve timing for exceptional driveability and fuel-efficiency and delivers 0-60mph in 7.1 seconds.

The Range Rover Evoque comes in two formats: five-door and coupé

NGK's ILTR6G8G spark plug was chosen for its ignitability and durability qualities on the Evoque, which is available in both five-door and coupé formats.

Brian Childs, Deputy Managing Director, NGK Spark Plugs (UK) Ltd, said: "We are delighted with the news that our spark plugs have been chosen for the new Range Rover Evoque.

"The selection of our plugs for this impressive new vehicle is further evidence of NGK's position as a major supplier of OE parts to the leading European vehicle manufacturers."

The new 240PS 2.0-litre Si4 six-speed automatic four-wheel drive comes in Range Rover's 'Dynamic' sporting format with deep body colour sills and bumpers, and black-finished mirrors, grille and side fender blades plus 20-inch Sparkle Silver alloys.

PRESS RELEASE

Inside the cabin detailed touches reinforce the sporty theme with aluminium pedal covers, a textured metal finish to the centre console and perforated leather around the steering wheel. The striking exterior of the Dynamic is complemented by a range of bold interior colour schemes.

Dynamic models also come with Adaptive Dynamics featuring MagnaRide™ as standard for an even sharper ride and handling.

On-the-road prices for the Evoque start from £27,955.
